RAHUL SINGH

SOC Analyst | Cybersecurity Analyst | SIEM & Threat Detection | Penetration Testing

+91-7533912134 | rs9012854@gmail.com | linkedin.com/in/rahulsingh2002 | github.com/rahulsingh2222 | rahul-cyber.vercel.app

Noida, India

PROFESSIONAL SUMMARY

Cybersecurity graduate (B.Tech, LPU) with SOC operations experience in SIEM-based threat detection, log analysis, network security, and incident response. Splunk Core Certified User with hands-on experience in Splunk, Sentinel, Wazuh, Wireshark, and Nmap. Currently a Cybersecurity Intern at CycloSec, learning unified SIEM, SOAR, EDR, and NDR operations. Built a Python SOC Log Analyzer detecting brute-force, port-scan, and anomalous-login activity mapped to MITRE ATT&CK.

TECHNICAL SKILLS

SIEM & SOC: Splunk, Wazuh, Microsoft Sentinel, SIEM Alert Triage, SOC Monitoring, Log Analysis, Log Parsing, Threat Detection, Incident Response, Alert Investigation, Security Event Correlation, SOAR, EDR, NDR

Security Tools: Wireshark, Nmap, Burp Suite, Metasploit, Hydra, OWASP ZAP, Kali Linux, Packet Analysis, Vulnerability Assessment, VM Labs

Networking & OS: TCP/IP, VPN, IDS/IPS, Firewall Rules, DNS, Traceroute, Ubuntu, Windows Server, Active Directory (basics)

Scripting & Dev: Python (log parsing, automation, Tkinter GUI), Bash, C/C++, JavaScript, Git

Frameworks: MITRE ATT&CK, OWASP Top 10, NIST CSF, Incident Response Lifecycle, Blue Team Defense, Cyber Kill Chain, Threat Intelligence

PROFESSIONAL EXPERIENCE

Cybersecurity Intern *Oct 2026 – Present*
CycloSec *Noida, India*

- Learning offensive and defensive security concepts on a unified autonomous SecOps platform (SIEM, SOAR, EDR, NDR, cloud security), including log parsing, enrichment, detection, and threat intelligence workflows.
- Practicing network scanning and traffic analysis using Nmap, Wireshark, and virtual machine lab environments.
- Reviewing SSH brute-force log data to understand attack patterns such as repeated failed logins (MITRE ATT&CK T1110).

SOC Technical Support Executive (L2) — Network & Security Operations Support *Jul 2025 – Sep 2025*
iEnergizer | Client: Tata Tele Business Services *Noida, India*

- Investigated and triaged 50+ network and security incidents per week, including VPN failures, authentication anomalies, and connectivity disruptions, following structured incident-management and SOC escalation procedures.
- Monitored system and network logs for anomalies; used ping, traceroute, and packet analysis to investigate connectivity and authentication issues.
- Documented recurring patterns, maintained incident records, and escalated by severity to security operations and field engineering teams through closure.

Cybersecurity Practitioner — Self-Directed Security Labs *2025 – Present*
TryHackMe Platform | 23+ Completed Rooms *Remote*

- Completed SOC Level 1 path: SIEM alert triage, Splunk log analysis, SOC dashboards, phishing investigation, and traffic analysis on attack simulations.
- Practised penetration testing (privilege escalation, web exploitation, enumeration) and blue team defense (threat hunting, IDS/IPS, IR) using MITRE ATT&CK and OWASP.

PROJECTS

SOC Log Analyzer *Python, Tkinter, SIEM Alert Workflow, MITRE ATT&CK* https://github.com/rahulsingh2222/soc-log-analyzer

- Real-time SOC dashboard parsing live system logs; detects brute-force (ATT&CK T1110), port scans, and anomalous logins with severity-coded alerts and exportable incident reports.

Steganography Tool *Python, LSB Cryptography, Threat Intelligence* https://github.com/rahulsingh2222/SteganographyTool

- Python GUI tool using LSB steganography to hide and extract encrypted messages in images; demonstrates data exfiltration and cryptographic concealment concepts.

FortifyPassword *JavaScript, SHA-256, OWASP A02, NIST SP 800-63* https://rahulsingh2222.github.io/FortifyPassword

- Web tool implementing SHA-256 hashing for secure credential storage; aligned with NIST SP 800-63 and OWASP Top 10 A02: Cryptographic Failures.

SELECTION HIGHLIGHTS

- **NTT Data (Fortune 500):** Reached final leadership interview for Cybersecurity Analyst. **Kreovate Nusa Digital, Indonesia:** Selected for a Penetration Testing role via technical evaluation.

CERTIFICATIONS

Splunk Core Certified User — Splunk (2026) | TryHackMe SOC Level 1 (Apr 2026) | Ethical Hacking Essentials — EC-Council (Dec 2024)

Intro to Cybersecurity — Cisco (Jul 2025) | Cyber Incident Response — Coursera (Apr 2024) | Computer Networking — Google/Coursera

EDUCATION

B.Tech — Computer Science & Engineering (Cybersecurity) *Aug 2021 – Aug 2025*
Lovely Professional University | CGPA: 7.0 / 10 *Phagwara, Punjab*
