

RAHUL SINGH

SOC Analyst | Cybersecurity Analyst | SIEM & Threat Detection | Penetration Testing

+91-7533912134 | rs9012854@gmail.com | linkedin.com/in/rahulsingh2002 | github.com/rahulsingh2222 | tryhackme.com/p/rs9012854 |
Noida, India

PROFESSIONAL SUMMARY

Cybersecurity graduate (B.Tech, LPU) with hands-on experience in SOC operations, SIEM-based threat detection, log analysis, and incident response. Splunk Core Certified User with hands-on experience in Splunk, Microsoft Sentinel, Wazuh, Wireshark, Nmap, and Active Directory fundamentals gained through professional experience, security labs, and personal projects. Built a Python-based SOC Log Analyzer that replicates Splunk-style Tier-1 alert triage with real-time brute-force and port-scan detection using the MITRE ATT&CK framework. Seeking an entry-level SOC Analyst, Cybersecurity Analyst, SIEM Analyst, or Security Operations role.

TECHNICAL SKILLS

SIEM & SOC: Splunk, Wazuh, Microsoft Sentinel, SIEM Alert Triage, SOC Monitoring, Log Analysis, Threat Detection, Incident Response, Alert Investigation, Escalation Runbooks, Security Event Correlation

Security Tools: Wireshark, Nmap, Burp Suite, Metasploit, Hydra, OWASP ZAP, Kali Linux, Packet Analysis, Vulnerability Assessment

Networking & OS: TCP/IP, VPN, IDS/IPS, Firewall Rules, DNS, Traceroute, Ubuntu, Windows Server, Active Directory (basics)

Scripting & Dev: Python (log parsing, automation, Tkinter GUI), Bash, C/C++, JavaScript, Git

Frameworks: MITRE ATT&CK, OWASP Top 10, NIST CSF, Incident Response Lifecycle, Blue Team Defense, Cyber Kill Chain

PROFESSIONAL EXPERIENCE

SOC Technical Support Executive — L2 Network Operations

Jul 2025 – Sep 2025
Noida, India

iEnergizer | Client: Tata Tele Business Services

- Triaged and resolved 50+ L2 network security incidents per week including VPN failures, authentication anomalies, and connectivity disruptions; logged all events in CRM following structured SOC escalation runbooks.
- Performed SOC monitoring of system and network logs to detect anomalous activity; investigated security alerts via ping, traceroute, and packet-capture, consistent with SIEM-style Tier-1 alert triage workflow.
- Documented recurring fault patterns to reduce repeat escalation rates; coordinated with field engineers and security operations teams for timely incident resolution.

Cybersecurity Practitioner — Self-Directed Security Labs

2025 – Present
Remote

TryHackMe Platform | 23+ Completed Rooms

- Completed SOC Level 1 path: SIEM-based alert triage, Splunk log analysis, SOC monitoring dashboards, phishing investigation, and network traffic analysis on real-world attack simulations.
- Practised penetration testing (privilege escalation, web exploitation, network enumeration) and blue team defense (threat hunting, IDS/IPS, IR) following MITRE ATT&CK and OWASP frameworks.

PROJECTS

SOC Log Analyzer *Python, Tkinter, SIEM Alert Workflow, MITRE ATT&CK*

<https://github.com/rahulsingh2222/soc-log-analyzer>

- Real-time SOC monitoring dashboard parsing live system logs; detects brute-force (ATT&CK T1110), port scans, and anomalous logins — replicates Splunk Tier-1 triage with colour-coded severity alerts and exportable incident reports.

Steganography Tool *Python, LSB Cryptography, Threat Intelligence*

<https://github.com/rahulsingh2222/SteganographyTool>

- Python GUI tool using LSB steganography to hide and extract encrypted messages inside images; demonstrates data exfiltration detection and cryptographic concealment concepts relevant to threat intelligence.

FortifyPassword *JavaScript, SHA-256, OWASP A02, NIST SP 800-63*

<https://rahulsingh2222.github.io/FortifyPassword>

- Web tool implementing SHA-256 hashing and deterministic obfuscation for secure credential storage; aligned with NIST SP 800-63 and OWASP Top 10 A02: Cryptographic Failures.

KEY ACHIEVEMENTS

- **NTT Data (Fortune 500):** Advanced to final leadership interview round for cybersecurity role — top ~5% of the candidate pool.
- **International Recognition:** Selected for a Penetration Testing role by Kreovate Nusa Digital (Indonesia), validating technical skills through an international selection process.
- **SIEM Build:** Independently built a functional SIEM-style threat detection tool as an entry-level candidate, demonstrating beyond-fresher technical depth.

CERTIFICATIONS

Ethical Hacking Essentials — EC-Council (Dec 2024) | Cyber Incident Response — Coursera (Apr 2024) | Intro to Cybersecurity — Cisco (Jul 2025)

Computer Networking — Google/Coursera | TryHackMe SOC Level 1: SIEM, Alert Triage, SOC Monitoring (Apr 2026) | Splunk Core Certified User — Splunk (2026)

EDUCATION

B.Tech — Computer Science & Engineering, Cybersecurity Specialisation

Lovely Professional University

Aug 2021 – Aug 2025
Phagwara, Punjab

- CGPA: 7.0 / 10
