Noida, India

PROFESSIONAL SUMMARY

Cybersecurity graduate (B.Tech, LPU) and Splunk Core Certified User with L2 network and security incident-handling experience (50+ incidents per week) and hands-on SIEM work in Splunk, Sentinel, and Wazuh. Currently a Cybersecurity Intern at CycloSec, working with SIEM, SOAR, EDR, and NDR workflows. Built a Python SOC Log Analyzer that detects brute-force, port-scan, and anomalous-login activity mapped to MITRE ATT&CK.

TECHNICAL SKILLS

SIEM & SOC: Splunk, Wazuh, Microsoft Sentinel, SIEM Alert Triage, SOC Monitoring, Log Analysis, Log Parsing, Threat Detection, Incident Response, Alert Investigation, Security Event Correlation, SOAR, EDR, NDR

Security Tools: Wireshark, Nmap, Burp Suite, Metasploit, Hydra, OWASP ZAP, Kali Linux, Vulnerability Assessment

Networking & OS: TCP/IP, VPN, IDS/IPS, Firewall Rules, DNS, Traceroute, Ubuntu, Windows Server, Active Directory (basics)

Scripting & Dev: Python (log parsing, automation, Tkinter GUI), Bash, C/C++, JavaScript, Git

Frameworks: MITRE ATT&CK, OWASP Top 10, NIST CSF, Incident Response Lifecycle, Cyber Kill Chain, Threat Intelligence

PROFESSIONAL EXPERIENCE

Cybersecurity Intern — *Sep 2026 – Present*
CycloSec — *Noida, India*

- Simulated SSH brute-force attacks against a lab VM using Hydra, then analysed the resulting authentication logs to identify repeated failed-login patterns and map them to MITRE ATT&CK T1110.
- Performed network scanning (Nmap) and traffic analysis (Wireshark) in VM labs to identify open services and suspicious traffic patterns.
- Worked through log parsing, enrichment, detection, and threat-intelligence workflows on CycloSec's unified SecOps platform (SIEM, SOAR, EDR, NDR, cloud security).

SOC Technical Support Executive (L2) — Network & Security Operations Support — *Jul 2025 – Oct 2025*
iEnergizer | Client: Tata Tele Business Services — *Noida, India*

- Investigated and triaged 50+ network and security incidents per week, including VPN failures, authentication anomalies, and connectivity disruptions, following structured incident-management and SOC escalation procedures.
- Monitored system and network logs for anomalies; used ping, traceroute, and packet analysis to investigate connectivity and authentication issues.
- Documented recurring patterns, maintained incident records, and escalated by severity to security operations and field engineering teams through closure.

Cybersecurity Practitioner — Self-Directed Security Labs — *Feb 2026 – Aug 2026*
TryHackMe Platform | 23+ Completed Rooms — *Remote*

- Completed SOC Level 1 path: SIEM alert triage, Splunk log analysis, SOC dashboards, phishing investigation, and traffic analysis on attack simulations.
- Practised penetration testing (privilege escalation, web exploitation, enumeration) and blue team defense (threat hunting, IDS/IPS, IR) using MITRE ATT&CK and OWASP.

PROJECTS

SOC Log Analyzer *Python, Tkinter, SIEM Alert Workflow, MITRE ATT&CK* — github.com/rahulsingh2222/soc-log-analyzer

- Real-time SOC dashboard parsing live system logs; detects brute-force (ATT&CK T1110), port scans, and anomalous logins with severity-coded alerts and exportable incident reports.

Steganography Tool *Python, Tkinter, Pillow, LSB Steganography* — github.com/rahulsingh2222/SteganographyTool

- Built a Python/Tkinter GUI that hides and extracts text messages in PNG/JPG images by modifying pixel least-significant bits; saves lossless PNG output so the hidden data survives; demonstrates data-concealment techniques relevant to digital forensics.

FortifyPassword *JavaScript, HTML/CSS, SHA-256* — rahulsingh2222.github.io/FortifyPassword

- Built a client-side web tool in vanilla JavaScript that rates password strength (length, case, digits, symbols) and generates a deterministic obfuscated variant alongside its SHA-256 hash; runs fully in the browser with no backend.

CERTIFICATIONS

Splunk Core Certified User (Splunk, 2026) | SOC Level 1 (TryHackMe, Apr 2026) | Intro to Cybersecurity (Cisco, Jul 2025)

Ethical Hacking Essentials (EC-Council, Dec 2024) | Cyber Incident Response (Coursera, Apr 2024) | Computer Networking (Google)

EDUCATION

B.Tech — Computer Science & Engineering (Cybersecurity) — *Aug 2021 – Aug 2025*
Lovely Professional University | CGPA: 7.0 / 10 — *Phagwara, Punjab*
